

# MASTER'S PROGRAMME IN INTERNATIONAL AFFAIRS & DEVELOPMENT

TRACK 127

## PEACE STUDIES

### Training

#### EDUCATIONAL / CONTINUOUS

Conflicts around the world have multiplied during the last 20 years and become more complex than what they were before the end of the Cold War. The evolution of Western societies has, moreover, broadened the understanding they traditionally reserved for the notion of «conflict», by extending it to situations of internal crisis although devoid of militarized violence.

Conflicts should not necessarily be seen as negative phenomena. Disagreements are natural and can be a source of innovation and progress. Violence is on the other hand disrupting and brings suffering to the parties concerned. This Master's programme aims at training individuals to manage and transform conflicts in a positive way, relying on pragmatic, scientific and independent approaches in the same time. So preventing the outbreak of violence, resolving crises, supporting peacekeeping and peacebuilding activities and seeking a vision of sustainable peace become possible.
